## DETAILED ACTION

### *Summary*

1. This Office Action is based on the Amendment filed with the Office on June 3, 2010, regarding the MOROOKA et al. application.
2. Claims 1-11, 13, and 14 are currently pending and have been fully considered.

### *Allowable Subject Matter*

3. Claims 1-11, 13, and 14 are allowed.
4. The following is an examiner's statement of reasons for allowance: Regarding the claim, each independent claim now recites, *inter alia*, a polymer matrix formed via a Michael addition (nucleophilic addition to an  $\alpha,\beta$ -unsaturated carbonyl) reaction. The state of the art for the claimed invention generally uses a free radical polymerization to form such a claimed polymer matrix. This process does not render obvious a Michael addition reaction.

The closest prior art to the instant claims has been previously been made of record, YONEHARA et al. YONEHARA discloses a solid electrolyte for use in electrical system, wherein is taught the method of forming an electrolyte comprising: forming a matrix polymer by polymerizing a first compound having at least two isocyanate groups (compounds containing diisocyanate groups, paragraphs [0058] and [0070]) and a second compound having at least two

nucleophilic groups containing active hydrogen (material containing alkylene glycol derivatives; claim 2), said polymerization being preformed after a precursor for the matrix polymer is brought into contact with a surface on which the electrolyte is to be formed (paragraph [0109]); wherein the electrolyte layer (2, Drawing 1) is formed between two electrodes (1 and 3, Drawing 1). However, YONEHARA forms the polymer via a photoinitiation process, which would preclude the reactants from reacting via a Michael addition reaction. A further search of the prior art did not yield a reference which taught or fairly rendered obvious the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
